

SECURITIES LENDING:

Delivering incremental returns through a risk-controlled program

Northern Trust Asset Management offers a suite of institutional commingled index funds (“Funds”)¹ that participate in securities lending. Benefits of investing in a lending Fund include:

- Increased returns generated from lending securities
- Reduced investment management fees

VALUE GENERATED BY SECURITIES LENDING

The Funds receive 70% of the gross revenue generated by securities lending, which is driven by two components: the lending spread from the intrinsic value of the securities on loan and the return from the cash reinvestment of collateral. As the table below illustrates, the contribution of securities lending to Fund performance will vary by asset class and is driven by the demand for specific securities.
