

DIVERSIFIED STRATEGIST PORTFOLIOS

The Diversified Strategist Portfolios (DSP) combine Northern Trust's asset allocation, portfolio construction and risk management expertise with factor-based equity and active fixed income strategies to provide globally diversified, risk-efficient solutions for a broad range of investor goals.

DSP incorporates investments from multiple asset classes (e.g., equity, fixed income and real assets) into a single separately managed account. Cost-efficient FlexShares® ETFs (exchange traded funds) and Northern Funds managed by Northern Trust serve as the primary underlying investment vehicles. This helps to position the portfolios to realize the potential benefits of active management, as well as the lower costs associated with passive indexing.

DSP's investment objectives range from income to maximum growth. Tax-sensitive fulfillment options are available for investors who seek to manage tax liabilities.

PORTFOLIO HIGHLIGHTS:

INSTITUTIONAL-CALIBER INVESTMENT MANAGEMENT

Your investments will be informed by the insights of our Investment Policy Committee (IPC), a global team of experts who oversee the ongoing management of our portfolios. This provides you with access to the same expertise enjoyed by sophisticated investors around the world.

A TIME-TESTED ASSET ALLOCATION APPROACH

Our dynamic asset allocation process, established on December 31, 2007, has a 17-year track record, through up markets, down markets — such as the great recession and the COVID crisis — and inflationary periods. The goal is to ensure your portfolio stays on track, no matter what the market conditions.

SEEKING TO ENHANCE RETURNS WHILE REDUCING RISK

Whether you worry about outlasting your savings, generating income to spend in retirement, tamping down volatility or keeping up with inflation, DSP can help you, with:

- 1) Diversification beyond traditional stocks and bonds—with investments such as natural resources, high yield bonds and Treasury Inflation-Protected Securities.
- 2) Active risk management—the Investment Policy Committee meets at least monthly to assess market conditions and DSP's asset allocation.
- 3) ETFs that can potentially outperform the market indexes over time by investing in stocks and bonds with differing characteristics, such as higher quality, more value-oriented, increased dividends, and smaller capitalization.

RISK/RETURN TRADE-OFF

IMPORTANT INFORMATION.

Northern Trust Investments, Inc. (NTI) is an investment adviser registered with the Securities Exchange Commission under the Investment Advisers Act of 1940. The company manages a variety of portfolios utilizing stocks, bonds, and exchange-traded funds (ETFs). The information contained herein is intended for use with current or prospective clients of Northern Trust Investments, Inc. The information is not intended for distribution or use by any person in any jurisdiction where such distribution would be contrary to local law or regulation. Northern Trust and its affiliates may have positions in and may effect transactions in the markets, contracts and related investments different than described in this information. This information is obtained from sources believed to be reliable, and its accuracy and completeness are not guaranteed. Information does not constitute a recommendation of any investment strategy, is not intended as investment advice and does not take into account all the circumstances of each investor. Opinions and forecasts discussed are those of the author, do not necessarily reflect the views of Northern Trust and are subject to change without notice.

This report is provided for informational purposes only and is not intended to be, and should not be construed as, an offer, solicitation or recommendation with respect to any transaction and should not be treated as legal advice, investment advice or tax advice. Recipients should not rely upon this information as a substitute for obtaining specific legal or tax advice from their own professional legal or tax advisors. References to specific securities and their issuers are for illustrative purposes only and are not intended and should not be interpreted as recommendations to purchase or sell such securities. Indices and trademarks are the property of their respective owners. Information is subject to change based on market or other conditions.

Forward-looking statements and assumptions are Northern Trust's current estimates or expectations of future events or future results based upon proprietary research and should not be construed as an estimate or promise of results that a portfolio may achieve. Actual results could differ materially from the results indicated by this information.

All securities investing and trading activities risk the loss of capital. Each portfolio is subject to substantial risks including market risks, strategy risks, adviser risk and risks with respect to its investment in other structures. There can be no assurance that any portfolio investment objectives will be achieved, or that any investment will achieve profits or avoid incurring substantial losses. No investment strategy or risk management technique can guarantee returns or eliminate risk in any market environment. Risk controls and models do not promise any level of performance or guarantee against loss of principal. Any discussion of risk management is intended to describe Northern Trust's efforts to monitor and manage risk but does not imply low risk.

There is no guarantee that the investment objectives of any fund or strategy will be met. Risk controls and models do not promise any level of performance or guarantee against loss of principal. Past performance is no guarantee of future results. FlexShares™ ETFs are sub-advised by Northern Trust Investments, Inc. For more information on the investment objectives, principle risks, and fees associated with these Funds, please see each Fund's prospectus and statement of additional information ("SAI"), which are available on the Advisors' websites at flexshares.com.

Northern Trust generally utilizes its own funds within this strategy. Northern Trust receives various fees from the funds via the fund expense ratios. Clients will incur these fees. Clients who access these portfolios through a financial intermediary firm will typically pay additional fees to that firm. Clients should speak to their Financial Advisor for more information. Financial intermediaries that employ Northern Trust for model management or overlay services may compensate Northern Trust for those services a fee of up to 0.15%.
